Objectives

Today, more than ever, there is a pressing need for information systems that effectively support the strategic objectives of the organization. Consequently, the individuals creating and managing such systems have to be much more familiar with the business aspect of their organization than was necessary in the past. Focus on management skills and knowledge required to make efficient use of information in the organization. Learn about significant aspects of both business management and information systems knowledge. Understand how to specify, develop and manage information systems as a strategic organizational resource. This program is geared for the business professional seeking an understanding of information management. The following topics will be covered in this course: Introduction, Information Systems, Strategic Management and Performance Evolution, Developing and Implementing change Programs, Organization and Management Issues.

Prerequisites

None

Text Book

Managing Information Systems: An Organisational Perspective, 2nd Edition, Prentice Hall, 2004.
